Chris,

How's the altitude?

This is an internal viewer only and it contains non validated data along with validated data. It could be shared to support operations but I would be careful of losing control of its distribution. If you could express those concerns to Chris Poulet I'd really appreciate it. We will be hosting a new public viewer which is the ops viewer but slimmed down with all published validated data and that will be on the .gov site at some point tomorrow.

Hi Kathie

I see you are doing a fantastic job!!

See Chris's Email below. Dan can get him access to the viewer, but I honestly don't know if the other info he is requesting is available

Thanks!

Chris

Subject: ATSDR Data request

Hi Christine

It was nice to see you again last week after so many years!

I know you are super busy this week. However, your assistance with this request would be greatly appreciated.

If possible, I would like to request access to the EPA data viewer for me...

My epa email address is poulet.chris@epa.gov

ATSDR is requesting the following data from EPA via the Area command in Durango CO when it becomes available

-Animas River

-**historic**, pre-event surface water sampling data for the Animas. We understand this is being compiled into a searchable format.

-**historic** , pre-event, sediment sampling data for the Animas.

-Private Well data for the wells being tested by EPA in the Animas river basin

-Sampling plans, sample location descriptions, and DQOs for surface water, sediment, and well data.

If you have questions, you can reach me at this email address or at 303 717 3089. If I need to check with another source for this request, please let me know.

Thanks,

Chris
